Al Arabia, Your Safety Oasis

Al Arabia for Safety & Security LLC, an affiliate of Juma Al Majid Holding Group LLC, was founded in 1977. Known for high-quality services and customised technology solutions, it protects various properties and infrastructures in the UAE. The company serves sectors including commercial, residential, healthcare, industrial, infrastructure, government, military, education, and aviation. Key offerings include firefighting systems, clean agent, pumps, fire alarms, emergency lighting, ELV systems, and ICT solutions. Leveraging partnerships with renowned manufacturers, it provides best-in-class technologies and customised solutions as an exclusive regional distributor.

Fire Fighting System

Fire Fighting Systems are crucial components of building safety infrastructure, designed to detect, control, and extinguish fires effectively. These systems play a pivotal role in safeguarding lives, property, and assets, making them indispensable in residential, commercial, and industrial settings.

We design our services to work together harmoniously, ensuring a comprehensive approach to fire safety- from Water-Based Fire Protection Systems, Fire Extinguishers, Hose-Reel Cabinets and Accessories, Sprinkler Systems, Firefighting Valves, and Fire Hydrants.

Our future-ready approach is deeply rooted into our offerings to ensure maximum fire safety. We also ensure regular maintenance, testing, and inspections which are crucial to ensure the proper functioning of firefighting systems.

Fire Pumps

Fire pumps are vital components of fire protection systems, playing a critical role in ensuring an adequate water supply for fire suppression. These pumps are specifically designed to provide a reliable source of high-pressure water flow, enabling effective firefighting efforts.

With a deep understanding of the importance of a reliable and efficient fire protection system, we offer fire pumps UL/FM approved across all capacities, including horizontal split case, vertical turbine, containerized with a flow up to 5,000 GPM, and a pressure up to 21 BAR.

The company is dedicated to delivering innovative solutions that meet the evolving needs of clients; our team of experienced engineers and industry professionals employ cutting-edge technologies and industry best practices to analyse project requirements, considering factors such as water supply, building size, and fire safety regulations to create customised fire pump systems that provide optimal performance and reliability. Our services also include fire pump hydraulic calculation, supply, installation, testing, commissioning, and maintenance.

Special Systems

As a team of safety and security experts, our primary focus is on designing and implementing specialised systems for buildings, specifically in the realm of:

- Clean Agent System including FM200 (HFC227), SHT125, FK-5-1-12
- CO₂ System including High- and Low-pressure systems
- Foam System, including High Expansion, Low Expansion, Foam Bladder Tanks, Foam Pumps, and Discharge Apparatus such as open nozzles, foam pourers, etc.
- Water Mist System
- Wet Chemical System for kitchen hood protection
- Aerosol System
- Extinguishant Control System
- Water Deluge System including pre-action and water spray for the LPG tanks

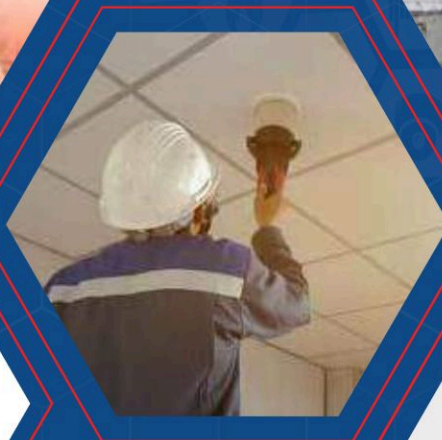

Integrated Fire Detection System

Early fire detection plays a critical role in mitigating risks and minimising potential damages. Bearing this in mind, our team utilises advanced technology and industry best practices to develop customised fire detection solutions tailored to the unique needs of each client and their specific environments.

Our process begins with a comprehensive assessment of the building or facility, factoring in parameters such as size, layout, occupancy type, and potential fire hazards. Based on this evaluation, we design integrated fire detection, voice evacuation and fire telephone systems that incorporate strategically placed detectors, sensors, and audio/visual alarms to provide an end-to-end solution for life safety with

- Detection: smoke/heat & multi-sensor detectors, beam detectors, flame detectors, duct detectors, gas detectors, and integrated interface modules
- Fire-rated cables & accessories
- Notification: Audio/Visual Evacuation Alarms
- Fire Telephone System
- Air Sampling System
- Disabled Toilet Alarm System
- Mass Notification System

We work closely with our clients to ensure that the fire detection system is seamlessly integrated into their existing safety infrastructure. This may involve coordinating with other components such as fire suppression systems, building management system, emergency lighting, and evacuation plans.

Emergency Lighting System

Our goal is to empower our clients with a robust and dependable emergency lighting system that safeguards occupants and facilitates safe evacuation during unforeseen events. By leveraging our expertise in safety and security, we strive to create an environment where individuals feel secure, confident, and protected, even in challenging situations.

We select and install a range of emergency lighting fixtures strategically placed in key areas such as exit routes, staircases, corridors, and high-risk zones. These fixtures are equipped with battery backup systems or connected to a central emergency power source, ensuring uninterrupted illumination during power outages or emergencies. These include:

- Central battery system
- Self-contained monitored system
- Self-contained system

Our experienced and certified engineers and technicians ensure that the emergency lighting systems comply with relevant safety codes and standards. We pay close attention to proper installation, wiring, and testing to guarantee the functionality and reliability of the system.

Oil & Gas Solution

At Al Arabia for Safety & Security, we specialize in providing comprehensive fire protection systems for the oil and gas industry. With over 40 years of experience, we are committed to ensuring the safety of personnel, assets, and the environment in high-risk industrial settings. Our innovative fire protection solutions are tailored to meet the unique challenges of the oil and gas sector, including offshore platforms, refineries, pipelines, and storage facilities.

Products & Services

Fire Suppression Systems: Custom-designed foam, Clean Agent System, and water mist systems for oil and gas facilities. **Fire Detection & Alarm Systems:** Advanced monitoring systems to ensure early detection and rapid response. **Fire Safety Equipment:** Comprehensive firefighting equipment including extinguishers, hoses, hydrants and pumps. **Maintenance & Inspection:** Regular system inspections, testing, and maintenance to keep systems operational at all times. **Consulting & Risk Assessment:** Expert consulting services to ensure your facility meets industry fire safety standards.

Why Choose Us?

Tailored Solutions: We work closely with clients to design fire protection systems that meet the specific needs of each project. **Experienced Technicians:** Our certified team has extensive expertise in both design and implementation. **Proven Track Record:** Successfully delivering fire protection systems to leading companies in the oil and gas industry. **Commitment to Safety:** We prioritize the safety of people and assets through high-quality systems that comply with global standards.

ICT and ELV Solutions

Our team recognizes the significance of ICT & ELV Solutions in ensuring the safety, security and well-being of occupants and promoting energy conservation. We leverage our expertise to design and install customised ICT & ELV solutions that meet the unique needs and requirements of each client. To name a few, our solutions include:

Security Solutions

- IP CCTV Surveillance
- Video Management
- Access Control
- Gate Barrier, Speed Gates Turnstiles
- Intrusion Detection System
- Security Software
- Biometric Systems
- Automatic Number Plate Recognition System
- Digital Door Lock
- Parking Management System

Extra Low Voltage Solutions

- Smart Home Automation Solutions
- Guest Room Management System
- UPS System
- Digital Central Clock System
- Nurse Call System
- Disable Alarm System
- Intercom (Audio / Video) System
- Voice Evacuation System
- Central Battery System /Emergency Lighting Control

Audio-Visual Solutions

- Professional Display Screens
- Digital signage & Videowall
- Conferencing – Audio & Video
- Smart Interactive Screen
- IP TV System
- SMATV System
- Background Music System
- Voice Evacuation System
- Professional Sound

IT Infrastructure & Networking

- Structured Cable Solution
- Wireless Solution
- Network Switching Solution
- Data Center Solution
- Server Solution
- Storage & Backup Solution
- Firewall Solution
- Network Software Solution
- IP Telephony Solution

Throughout the installation process, our certified and experienced engineers, and skilled technicians – also certified across multiple platforms – ensure the proper implementation based on international quality standards as well as adhering to necessary local safety and security regulations. We prioritise precision in wiring, connectivity, and device integration to ensure optimal system performance. By implementing robust and secure ICT and ELV infrastructure, we empower organizations to enhance their operations, foster collaboration, boost productivity, and drive overall growth. Our comprehensive Smart Technology & Digital Transformation Solutions include:

- **IoT Integration:** We connect devices and systems to the Internet, enabling real-time data exchange and remote monitoring. This integration enhances operational efficiency and provides valuable insights.

-

Smart AI-Driven Analytics: Our use of artificial intelligence allows us to analyze vast amounts of data for predictive maintenance, automated decision-making, and improved resource management. This enables organizations to respond proactively to emerging challenges.

-

- **Big Data Utilization:** We harness the power of big data to deliver actionable insights that inform strategic decisions, optimize processes, improve customer experiences, and identify new growth opportunities.

- **Security Solutions:** Our comprehensive security solutions encompass physical security systems, such as surveillance cameras and access control, as well as cybersecurity measures to protect sensitive data. We implement cutting-edge technologies to ensure the safety and integrity of your information and assets of data for predictive maintenance, automated decision-making, and improved resource management. This enables organizations to respond proactively to emerging challenges.

- **Big Data Utilization:** We harness the power of big data to deliver actionable insights that inform strategic decisions, optimize processes, improve customer experiences, and identify new growth opportunities.

After-Sales Solutions

Al Arabia for Safety and Security provides comprehensive after-sales solutions to ensure customer satisfaction and continued support. Our commitment extends beyond the initial sale, focusing on building long-term relationships with clients and addressing their ongoing needs.

Our services encompass a range of services, including maintenance and support, upgrades and modernization, and technical assistance. Our very own UL-certified gas filling stations in Dubai and Abu Dhabi mean clients are constantly operational with minimal downtime.

By offering comprehensive after-sales solutions 24/7, our team demonstrates its commitment to customer satisfaction, ongoing support, and the longevity of safety and security systems. Our focus on post-sale services ensures that clients receive the necessary support and expertise to maintain and optimize their systems for years to come.

OUR CLIENTS

Partners in Our Success

We build lasting relationships through trust, reliability, and excellence, providing seamless experiences and exceptional service to meet every client's unique needs.

PRODUCTS

Empowered **Protection Solution**

Offering a full range of advanced safety products designed to protect lives and infrastructures.

Angus Fire, UK, Fire Fighting Systems

Angus Fire, a global leader in firefighting technology, boasts over 220 years of manufacturing excellence. Committed to innovation, they produce high-performance products for diverse industries in over 100 countries. Accredited with ISO 9001, their expertise spans fire hoses, foam concentrates, and

Edwards, USA, Fire Alarms Systems

Edwards, a global leader in life safety solutions since 1872, offers advanced fire alarm and safety systems. Known for modular, scalable, and integrated solutions, Edwards is trusted worldwide for delivering reliable and innovative technology, backed by over 150 years of excellence.

Reliable, USA, Fire Fighting Systems

Reliable Automatic Sprinkler Co., Inc. is a global leader in manufacturing and distributing innovative fire protection products, including sprinklers, valves, and special systems. They offer top-quality components and exceptional customer service.

JAM Guard: Premium Fire Fighting Solution

JAM Guard is a high-quality firefighting equipment designed to ensure the highest standards of safety and reliability. Manufactured to meet the demanding needs of both commercial and residential fire protection, JAM Guard stands out in the industry as a trusted, advanced solution for fire safety with various approval such as UL,

Walker Fire, UK, Fire Fighting Systems

Walker Fire, founded in 1940, is part of the Moyne Roberts Group, a major European fire safety equipment manufacturer. With over 75 years in the sector, they offer top-quality products like dry and wet risers, fire extinguishers, hoses, and building connections.

Amerex, Fire Fighting Systems

Amerex, a leader in the fire protection industry, offers cutting-edge firefighting extinguishers and pre-engineered fire suppression systems for commercial kitchens. Known for excellence, quality, and innovation, our partnership with Amerex ensures advanced firefighting solutions for our clients.

NIBCO, USA, Fire Fighting Valves

NIBCO valves are renowned for their ruggedness and reliability, making them the preferred choice for fire protection systems globally. Used in commercial, residential, industrial, and oil and gas sectors.

SEM-SAFE, Water mist System

SEM-SAFE® high-pressure water mist for fire fighting is the optimal solution for energy generating facilities, such as power plants, wind turbines, data centers, and tunnels, to name just a few. High-pressure water mist technology is reliable and will activate fast.

Croker Corp., USA, Fire Fighting Systems

Croker, a century-old leader in fire protection equipment, serves diverse sectors globally with comprehensive solutions. Their wide-ranging product line ensures effective fire protection tailored to specific needs, enhancing safety for commercial, industrial, and institutional environments worldwide.

Protector Safety Ind. Co., Fire Fighting Sprinkler Systems

Protector Safety Ind. Co. has been a leader in fire protection for over two decades, ensuring products meet UL and FM standards. Known for benchmark-quality solutions like water sprinklers and fire protection systems, they strive to create safer environments with reliable and high-quality products.

Firepro, Cyprus, Aerosol System

FirePro is a global leader in environmentally friendly condensed aerosol fire extinguishing technology. With two decades of expertise, FirePro holds WIPO registration and international certifications, underscoring its commitment to high standards and global market leadership.

Janus Fire Systems, USA, Fire Suppression Systems

Janus Fire Systems, an ISO 9001 Certified Manufacturer in the US, specializes in UL-listed/FM approved special hazard fire protection equipment. Their products include FM200, NOVEC1230, and CO₂ systems, tailored for areas requiring advanced fire protection beyond conventional

Safety Hi-Tech, Italy, Fire Suppression Systems

With nearly three decades of experience, SHTE® is recognized globally for its fire extinguishing agents and suppression systems. Safety Hi-Tech Europe SRL (SHTE®) is a leading provider of fire suppression, clean agents, and Halon alternatives.

Elkhart Brass, USA, Fire Fighting Systems

Elkhart Brass, with over 2,000 products, develops integrated systems of monitors, valves, foam proportioning, and electronic controls for global firefighting. Their products are essential in fire departments, building systems, offshore drilling, military, marine,

SyncroFlo, Pumping Systems Solutions

SyncroFlo has over 50 years of experience in manufacturing FM/UL-approved Fire Pumps with duties ranging from 200 to 5000 US gpm and up to 24 bars. Their product range includes horizontal split-case, vertical turbine, and in-line pumps.

Cooper by Eaton, Fire Alarm System

Cooper by Eaton Fire Alarm Systems offer reliable, advanced fire detection with seamless integration for enhanced safety. Designed for residential, commercial, and industrial use, they ensure rapid hazard detection, protecting lives and assets with cutting-edge

Hochiki

Hochiki is a global leader in commercial and industrial fire detection solutions, with over a century of expertise. Operating independently, the multinational company employs 1,500+ personnel across five manufacturing plants, 31 sales offices, and 18 subsidiaries. Hochiki Europe serves Europe, the Middle East, CIS, Indian Subcontinent, and Africa, offering advanced products

Menvier, Emergency Lighting System

Menvier by Eaton leads with high-quality, efficient self-contained emergency lighting solutions. Their certified luminaires and technologies optimize safety and maintenance efficiency, featuring advanced LED light sources.

ROPAG, Emergency Lighting System

The RP Group, Germany's top developer of emergency and safety luminaires, offers advanced LED and central battery systems. Through our partnership with ROPAG, we provide comprehensive advisory, planning, and project implementation support for safety lighting projects.

TOA, Public Address System

TOA sets industry standards with innovative solutions across Voice Evacuation, Intercom, Professional Sound, Distribution, Background Music, and Conference Systems. Their expertise ensures quality, safety, and seamless communication, enriching audio experiences

Major Project References

This is a partial list of major projects in Aviation, Commercial, Residential & Industrial sectors, our firm has executed/under execution till present:

Major Airport Projects

Project	System	Emirates
○ Aerogulf Services	Hangar Fire Protection, Low Expansion Foam System	Dubai
○ Jet Aviation	Hangar Fire Protection, High Expansion Foam System	Dubai
○ Executive Flight Services Hangar	Hangar Fire Protection, Deluge Foam Water System	Dubai
○ Execujet Hangar	Hangar Fire Protection, High Expansion Foam System	Dubai
○ Dubai Police Airwing Hangar	Hangar Fire Protection, Low Expansion Foam System	Dubai
○ North office extension at Dubai International Airport (DIA)	Sprinkler, Hose Reel & Fire Alarm System	Dubai
○ Fire Stations at DIA (TD-60) Dubai Int. Airport	Sprinkler & Fire Alarm System	Dubai
○ Terminal-2 at DIA (TD-62) Dubai Int. Airport	Sprinkler, Standpipe & Fire Alarm System	Dubai
○ Airport Expo (Dubai Air Show 2000)	Sprinkler, Standpipe & Fire Alarm System	Dubai
○ Light Industrial Units at DIA Free Zone	Sprinkler, Standpipe & Fire Alarm System	Dubai
○ TD48 Concourse Steel Structure & Tunnel Finishes	Sprinkler, Standpipe, Deluge, Pre-Action, Clean Agent, Yard Hydrant System	Dubai
○ DIA TD-53, Central Plant	Sprinkler, Standpipe, Deluge & Fire Alarm System	Dubai
○ Terminal 3 & Concourse II at Dubai Int. Airport	Standpipe, Sprinkler, Preaction, FM 200, Vesda & Fire Alarm System	Dubai
○ Concourse-3 at Dubai International Airport	Fire Fighting & Fire Alarm	Dubai
○ Concourse-4 at Dubai International Airport	Fire Fighting	Dubai
○ GRC, Jebel Ali	Fire Fighting	Dubai
○ SASCO - Sharjah Aviation Services Company LLC Jet A - 1, Storage Depot	Fire Fighting	Sharjah
○ Etihad Terminal - Abu Dhabi	Fire Fighting System, Sprinkler, FM 200 & Foam System	Abu Dhabi
○ Air Traffic Control Complex - Abu Dhabi	NAF Fire Suppression, Preaction & Sprinkler System	Abu Dhabi
○ Air Traffic Control Complex - Abu Dhabi	NAF Fire Suppression, Preaction & Sprinkler System	Abu Dhabi
○ Abu Dhabi Airport - Terminal-3 Carpark Building	Fire Fighting System, NAF Fire Suppression & Sprinkler System	Abu Dhabi

Major Commercial Projects

Project	System	Emirates
○ “The Tower” for Union Properties	Sprinkler, Wet Riser & Fire Alarm System	Dubai
○ Shangri La Hotel	Fire Alarm System	Dubai
○ Dubai Mall / Dubai Mall Address Hotel	Fire Alarm, Fire Fighting System & Clean Agent System	Dubai
○ The Dubai Mall Expansion – Fashion Avenue	Fire Fighting & Fire Alarm	Dubai
○ The Dubai Mall Zabeel Expansion	Fire Alarm	Dubai
○ Burjuman Center and The Expansion	Sprinkler, Standpipe, Clean Agent, Foam, Deluge, Water Mist And Fire Alarm System	Dubai
○ Expo Center Sharjah	Sprinkler, Wet Riser System & Yard Hydrant System	Dubai
○ Grand Hyatt	Sprinkler, Wet Riser, FM200, Kitchen Hood System	Dubai
○ Dubai Internet City, Phase II & III	Sprinkler, Standpipe & Fire Alarm System	Dubai
○ Between The Bridges Resort Development	Fire Fighting System, Sprinkler, FM 200 & Foam System	Dubai
○ R1004-Al Maktoum Hospital redevelopment	Fire Fighting & FM200 System	Dubai
○ Al Fahidi Market - Bur Dubai	Fire Fighting System	Dubai
○ Al Dana Hotel	Fire Fighting & Gas System	Dubai
